Grzegorz Przebinda is full professor at the Jagiellonian University and Carpathian State University in Krosno, Poland. His chief areas of academic interest include Russian philology, the history of ideas, translation, and the culture and history of Russia, Ukraine and Belarus.

De façon surprenante, la sociologie de l’État et de l’administration a tendance à ignorer les corps intermédiaires de fonctionnaires qui représentent pourtant le gros des effectifs ministériels et des rouages essentiels de l’action étatique. En France notamment, les analyses se limitent le plus souvent aux deux extrêmes des structures bureaucratiques, laissant systématiquement dans l’ombre tous les acteurs administratifs du milieu, qui ne sont ni des hauts-fonctionnaires ni des street level bureaucrats. Qui sont ces fonctionnaires du milieu ? A quoi servent-ils exactement ? Que font-ils concrètement ? Dans quels espaces évoluent-ils ? Comment travaillent-ils ? De quoi décident-ils ? C’est à ces différentes questions que ce livre propose de répondre, en suivant pas à pas le processus de réforme de la politique publique de prévention des risques industriels engagé il y a presque vingt ans suite à la catastrophe d’AZF de septembre 2001.

Poland and Taiwan: two parts of the world distant from each other, differing culturally and socially, and yet facing kind of similar challenges in the late 1980s and early 1990s – characterised by the transition from an authoritarian political system to liberal democracy. This book seeks to present the process of democratisation of Poland and Taiwan from the point of view of shared perspectives. Invoking the classical literature of transitology, it is possible to explore similarities and differences between the democratisation of Poland and Taiwan among socio-economic factors, fragmentation in society, political culture, meso- structures (e.g. political groups, social movements), political institutions, historical and national- identity aspects, and international influences.

The book on the history of Russian philosophical thought of the nineteenth century deals with six important representatives in the sharply present context of the ideological dispute between East and West. The author has chosen for analysis such Russian concrete worldviews which either advocated dialogue between Russia and the West, or particularly sharply proclaimed the conflict between them. Agreement should be made either in the name of universal-humanist Christian principles, with a special emphasis on Catholicism, or in the name of Enlightenment principles. None of these thinkers are popular in Putin’s Russia today, unlike Dostoevsky and Leontiev, the prophets of the fundamental conflict between Russia and Europe, also discussed in this work.

Political Science & Theory

This volume is a collection of papers written over the course of forty years. It examines political attitudes, patterns of political behavior, and institutional framework of transition to democracy in Poland. Its contents have been shaped by and provide commentary on the often-dramatic political developments in Poland: the emergence of the massive liberation movement “Solidarity” in 1980–81; the dissent against the communist regime in the 1980s; the struggles to pave the roads toward consolidated democracy in the 1990s; and the problems with adaptation to European liberal values in the 21st century that led to democratic backsliding. In conclusion, it presents the cultural and structural background of the cleavage between the proponents of open society and its enemies.

Krzysztof Jasiewicz is the William P. Ames Professor in Sociology and Anthropology at Washington and Lee University and the Editor of East European Politics and Societies. He received his education at the University of Warsaw and the Polish Academy of Sciences. His research has focused on political attitudes and behavior in Poland.

Politics & Government

Cet ouvrage, qui rassemble onze contributions, analyse la “polycrise” qui traverse l’Union européenne au XXIe siècle. Fruit du travail réalisé au sein du Groupe de recherche sur l’Union européenne (GrUE), il déploie une approche de sociologie politique reposant sur des enquêtes de terrain de Bruxelles à Paris en passant par Berlin et Londres. Au fil des chapitres, les contributions analysent différentes crises (Grande Récession, attaques terroristes, Brexit, Covid-19) afin d’initier une réflexion transversale sur l’élaboration, la mise en œuvre et la légitimation de l’action publique européenne et ses transformations. Plutôt que d’interroger ce que les crises font à l’Europe, cet ouvrage questionne ce que les acteurs font et défont “au nom de la crise”. Par ce déplacement du regard, la crise n’est plus perçue comme une succession de chocs exogènes qui produiraient “plus ou moins d’Europe” mais comme un registre d’action, une ressource politique et un objet de mobilisation démocratique.

Lola Avril est chercheuse post-doctorante à la University of Eastern Finland après avoir passé trois ans à l’Institut universitaire européen (Florence). Elle a soutenu sa thèse de science politique à l’université Paris 1 Panthéon Sorbonne en 2019. Samuel B. H. Faure est maître de conférences en science politique à Sciences Po Saint-Germain-en-Laye et chercheur au laboratoire de recherche CNRS Printemps à l’Université Paris-Saclay. Vincent Lebrou est maître de conférences en science politique à l’Université de Franche-Comté et membre du Centre de recherches juridiques de l’Université de Franche-Comté.

“Selon Jean Monnet, “l’Europe se fera dans les crises”. Cet ouvrage met cet adage à l’épreuve en analysant avec rigueur comment les acteurs de l’Union européenne, avec des moyens inégaux, se saisissent de situations concrètes pour obtenir de nouveaux moyens et instruments de politique publique. Une démonstration efficace de l’apport de la sociologie politique pour comprendre les enjeux européens.”

- Virginie Guiraudon, CNRS / Sciences Po Paris

“On dit qu’il ne faut jamais gaspiller une bonne crise. En explorant les groupes d’acteurs et les usages qu’ils font du registre de la crise dans différents domaines de l’Union européenne, cet ouvrage éclaire un angle mort de la science politique. Il illustre aussi la vitalité et l’originalité des études européennes dans l’espace francophone.”

The monograph explores the heritage of Central and Eastern Europe, which is particularly important nowadays in the era of globalization, on the one hand, and nationalism, on the other, and the war on the third hand. It can indicate ways to “face” the challenges Europe is currently facing. The research on the heritage issue aims to foster a greater understanding of the various mechanisms of today’s social and political decision-making. This publication is the result of the work of a team of scholars whose research explores the subject of the heritage and who represent countries and cultures belonging to the region. This is, therefore, research done from within according to the Latin principle: “Nihil novi nisi commune consensu” (Nothing new without the common consent). [...] [Click here](#) to read more.

The book consists of four chapters. The second chapter contains a list of research problems and questions, a presentation of the philosophical worldviews (research paradigms) of the project team who guided the planned research and which resulted in the adoption of research strategies compatible with them, and, consequently, procedures and techniques for obtaining source materials and their analysis. In the third chapter, we present a set of terms, ideas, and concepts which inspired the project team as useful tools for describing and analysing the phenomenon under study. The fourth chapter is a kind of ligature that binds together all the previous findings, [...] [Click here](#) to read more.

This book has two research objectives. The main objective is to present the dynamics of the system reform of the Economic and Monetary Union in 2010–2022. The other is to take stock of the reform and to highlight its successes and failures. In this context, the monograph puts forward two research hypotheses. The first hypothesis assumes that the shortcomings in EU primary and secondary law regarding the Economic and Monetary Union and the course of the euro area debt crisis were two main reasons for reforming the EMU, whereby the crisis in question actually forced the European Union and the euro area countries to implement the reform. The second hypothesis is based on the assumption that the implementation of the system reform encountered many difficulties and obstacles arising from the negative attitude of the governments of some euro area Member States to the execution of selected projects, [...] [Click here](#) to read more.

Geopolitics

The continuity in Russian state foreign policy revolves around two fundamental elements: the pursuit or maintenance of great power status and underlying political ideologies. Throughout both the Tsarist and Soviet periods, a primary objective was the attainment or preservation of great power status. Political ideas that developed since the Tsarist period put forward assumptions about national identity, the role of the Russian state in the world and geopolitics, and shaped Russian foreign policy. Russia lost its great power status after the collapse of the USSR. However, under Putin's leadership, Russia has pursued a foreign policy aimed at reclaiming this status. Dans ce petit ouvrage, Michel Carpentier (1930-2022) raconte ses trente-six ans de vie dans les institutions européennes et sa contribution de visionnaire au lancement de plusieurs politiques. Michel Carpentier a intégré la Commission d'EURATOM le 14 juillet 1959 à Bruxelles, où il fut désigné responsable du service des achats et des marchés. En 1967, lors de la fusion des Commissions, il a rejoint la Direction Générale des Affaires Industrielles, Technologiques et Scientifiques (DG III) où, en 1971, à l'initiative d'Altiero Spinelli, alors commissaire responsable de l'Industrie, il rédigea la première communication de la Commission Européenne sur l'environnement, « une donnée indissociable de l'organisation et de la promotion du progrès humain ». Le Service de l'environnement et de la protection des consommateurs qu'il a dirigé jusqu'en 1981 a préparé soixante directives visant à la prévention et diminution des pollutions de l'eau, de l'air et du bruit, récupération des déchets, protection du milieu naturel, notamment de la faune sauvage, la protection des mers et des fleuves, etc.

Cet ouvrage explore un dossier politico-scientifique aujourd'hui encore méconnu, celui du dépôt des munitions produites durant la Seconde Guerre mondiale par la Suisse et immergées, la paix revenue, par les autorités dans les lacs helvétiques. À une époque où les enjeux écologiques sont primordiaux pour notre avenir collectif planétaire, il s'agit à la fois de comprendre les motivations et raisons de ce choix qui nous paraît désormais antiécologique et les enjeux actuels de gestion ou non de ces déchets militaires.
Fondé sur une approche interdisciplinaire, ce livre rend compte, dans une double perspective d'historien des sciences et des sciences de la société, à la fois des décisions publiques ayant conduites à l'immersion, [...] [Click here to read more.](#)

Pourquoi les guerres contre le terrorisme échouent-elles ? Depuis les interventions militaires en Afghanistan, en Irak, en Syrie et au Nord-Mali, les recommandations stratégiques formulées par les États occidentaux ont évolué de la criminalisation du terrorisme à son éradication par la force armée. Pourtant, la violence terroriste perdure.
En France, les diplomates sont chargés de l'élaboration de ces recommandations stratégiques. Or un clivage idéal apparaît : pourquoi certains d'entre eux soutiennent, par exemple, massivement l'intervention française au Mali, alors que d'autres se montrent beaucoup plus prudents, comme l'ancien ministre des Affaires étrangères Dominique de Villepin ? The book studies the Hazara Ismailis of Afghanistan – a community that endured years of marginalization in a repressive environment, persevered and sustained the faith while maintaining and practicing Taqiyya, dissimulation of their faith. It examines policies and actions of local authoritarian Ismaili religious leaders in controlling every aspect of the community affairs. The book also explores the status of Ismailis during and after the US-NATO occupation period and efforts by the Ismaili spiritual leader, the Aga Khan who in 2002 with a stroke of a pen removed the tyrant Ismaili leaders - abolished the hereditary system of leadership in the Ismaili community, established modern institutional structures and appointed new generation of leaders to guide the community for a three-year term renewable once – a system of leadership that liberated Ismailis from bondage to their local religious and tribal leaders and allowed grassroots participation of the people in the daily affairs of their community.

In two broad dimensions, that is, the vertical historical presentation and horizontal structural description, the chapters in the main body systematically review how Nigeria has developed from a traditional tribal society to a modern state over the past century; the political changes, economic growth, social transformation, and cultural reconstruction it has undergone; [...] [Click here to read more.](#)

The book is the result of a collective research work between the members of the team of the project “Over the Atlantic” (co-founded by the Erasmus + programme). A critical introduction presents the work, the content and the scope of the research, carried out with an interdisciplinary approach.
This book consists of three main parts. The first discusses the institutionalization and normalization of paradiplomacy in some specific and well-documented case studies regarding the Latin America region. The second one refers to the relationship between paradiplomacy and cooperation in the context of international and regional relations. The third part analyses Cities and Parliaments as international diplomatic actors. The theme of Paradiplomacy, as a means of unofficial relationships that reacts differently to the pressure of the international system, and the role of the local authorities, despite its relevance and importance, is scarcely analysed by academia.

This book explores three key issues to understand the redefinition of relations between the European Union (EU) and Latin America and the Caribbean (LAC): the international context, foreign policies of EU member states towards Latin America, and crucial topics on the EU-LAC agenda.
At the theoretical level, the book aims to rebalance two debates on EU-LAC relations. First, in the debate between agency and structure, the book stresses that context is a limiting factor of the agent's preferences and actions. Second, in the debate between values and interests, it finds that interests should not be made invariably dependent on values. [...] [Click here to read more.](#)

“EU-Latin American relations are in a phase of redefinition. This timely book addresses both the structural obstacles and the prospects and areas for deeper cooperation. Against the background of diverging positions of Latin America and the EU in international politics, the proposed decoupling of political and functional agendas should be considered.”
- Detlef Nolte, German Institute für Global and Area Studies (GIGA)

“This book makes an original and significant contribution to the study of the relations between the European Union and Latin American and the Caribbean. The volume blends wisely the right doses of scholarly research and policymaking sensitivity, thus making for an innovative read for academics and an insightful contribution for practitioners.”

The Maastricht Treaty remains a crossroad in the history of European integration. Since its ratification, policy areas at the core of the national sovereignties have been included in the Brussels agenda, the power balance between the European institutions has started to mutate, and the European Union affairs have progressively become a controversial issue in the public debate. The goal of the book is to provide a comprehensive analysis of the politicization of European affairs. The final aim is to assess the institutional and socio-political impact of EU politicization, detecting how the European elites could exploit the saliency gained by European affairs to enhance the legitimacy and effectiveness of the European institutions.

China's international political prominence is currently facing a strategic challenge and significant dilemma due to its image abroad. To address this, China is utilizing the Belt and Road Initiative (BRI) to shape its global image and enhance strategic engagements in the Afro-Eurasia region and beyond. This study employs a longitudinal content analysis method to examine China's political, cultural, economic, technological, and social image in the most influential Islamic English news media. It critically analyzes China's construction, interpretation, and dissemination of its global image in the context of the BRI. Furthermore, it sheds light on the historical and current relations between China and the Islamic world, including future prospects and potential challenges to China's rise as an alternative global power for the Islamic world.

“This book provides a comprehensive and critical analysis of China's strategic efforts to shape its global image through the Belt and Road Initiative in the Islamic world. By analyzing influential Islamic English news media, it sheds light on the historical and current relations between China and the Islamic world and offers valuable insights into future prospects and potential challenges. This book is essential for scholars and policy-makers interested in comprehending China's evolving global image and its impact on Sino-Islamic relations.”
- Wu Fei, Qiushi Distinguished Professor, Director of International Communication Research Center, Zhejiang University, Hangzhou, China

“It is increasingly important that, with the Belt and Road Initiative (BRI) now on the books for a solid decade, we begin to take stock of its global impact in granular terms. This timely, well-illustrated book, which explores the nexus of BRI and China's image as constructed in select English-language news media, does that with compelling, insightful analyses and with effulgent statistical data to boot in, and about, a region that is an archetypal Islamic influence.”

The concept of hybrid warfare is as old as warfare itself. However, it has re-emerged with an expanded scope in the twenty-first century. The purpose of the entire campaign is to break the will of the people and win the war without fighting. The modus operandi of the planning and execution of today's hybrid warfare, particularly against unequal military powers (UMPs), is very similar to the precepts of the Chinese sage, Sun Tzu, who prophesied of winning the war without fighting. An analysis of Sun Tzu's *The Art of War* reveals that he was a proponent of expanding state's influence without the use of force. [...] [Click here to read more.](#)

Political Ideologies

This book develops the main political lessons that the Mexican Neozapatismo movement brings us, in its almost 30 years of public life. Thus, beginning by defining the singular concept of Autonomy that the Neozapatista movement proposes, different from legal, anthropological or political definitions, and conceived as real global autonomy. Then the content of the Neozapatista oxymoron 'Mandar Obedeciendo', 'To Lead by Obeying' is explained as identical to the idea of popular self-government. A new concept of autonomy is linked necessarily with the idea of 'Other Politics' and 'Other Democracy'. The book also presents how Neozapatismo embodies a project of modernity that, having been constructed as a modernity of resistance for five centuries to the dominant modernity imposed by the Spaniards in Mexico, has now been transformed into a project of a real alternative modernity to capitalism.

This book presents a broad international and interdisciplinary perspective on the role of religion in American politics (both domestic and international). It is a result of cooperation between Jagiellonian University scholars and an international group of academics, including renowned American specialists, who study the interactions between religion and American politics. Coming not only from the USA, but also from Israel, Spain, Hungary, Poland, and the Palestinian territories, they provide a unique international perspective on how the USA deals with issues on the intersection of religion and politics. The book covers a variety of topics, including civil religion, legal issues, religious liberty, the public role of Black churches, religious influences on U.S. politics and on public attitudes toward a number of domestic and international policy issues.

Comment la quantification renouvelle-t-elle les manières de connaître et de gouverner la nature ? Telle est la question générale à laquelle cet ouvrage cherche à répondre en testant une proposition centrale : suivre les processus concrets de mise en nombre de la nature depuis l'hétérogénéité de leurs modes de production en amont et jusqu'à la diversité de leurs modalités d'usages plus aval. Qu'il s'agisse d'inventaire ou de mesure, d'indicateur ou de modèle, cet ouvrage propose ainsi de caractériser quelques-unes des significations pratiques de ces processus à travers deux types de contributions : des contributions théoriques présentant des synthèses pédagogiques de l'abondante littérature sur le sujet et des contributions empiriques décrivant la spécificité des opérations cognitives et politiques que de tels processus supposent et génèrent.

This book compiles analyses of various political and ideological expressions of class struggle within the ruling capitalist class during the monopolistic phase of capitalism, commonly known as imperialism. The authors primarily focus on the post-World War II era. Since 1945, the United States has held a pivotal position, playing a significant role in the class struggle of the monopolistic (imperialist) bourgeoisie. The book examines the different forms and manifestations of this class struggle in relation to the coalition of Eastern European socialist countries, with a particular emphasis on Latin American nations during the Cold War. Using dialectical materialism as their methodological framework, the authors interpret the Cold War as a counter-revolutionary offensive by imperialism against post-war socialism led by the Soviet Union. Considered by many the most talented continuator of the Nashville Agrarians, Melvin E. Bradford occupies a special place in the history of modern Southern conservatism. Bradford challenged established views of the founding, nature, and political tradition of the American Union and, most controversially, the "myth" of Abraham Lincoln. His writings substantially expanded the cultural and intellectual vision of the Agrarians by adding a new political dimension, and provided vitality and intellectual weight to the Southern conservative tradition. Bradford's scholarship can significantly contribute to a more multifaceted and nuanced understanding of American history, tradition, and identity. This book is the first comprehensive analysis of Bradford's political thought.

This book examines the Covid-19 pandemic from a social, cultural and philosophical perspective. In a unique and innovative approach, it addresses its subject by recounting the authors' thoughts during the two long years of the pandemic, from 2020 to 2022. A pandemic reveals numerous tensions in society: forces that remain hidden during prosperous times, such as fear, violence, or the devaluation of human rights, emerge as significant factors during a social crisis. A pandemic is, therefore, useful as a phenomenon for studying human weaknesses and for evaluating the development of humanitarian crises when few people care about appearances, and there is little to hide because life itself is in the balance. This book will be of interest to students, [...] [Click here to read more.](#)

Depuis la fin de la décennie 1990 jusqu'au moment de la publication de ce livre, la République Démocratique du Congo est secouée par des guerres récurrentes. La littérature sur cette instabilité a retenu trois causes unilatéralement crispées sur un élément explicatif : la guerre pour le contrôle des ressources, les conflits intercommunautaires ainsi que les conflits régionaux dans la région des Grands lacs africains. En explicitant le pré-supposé de ces approches qu'il surmonte par l'approche institutionnelle, ce livre met en exergue le facteur essentiel à l'origine du mal congolais et propose des politiques publiques susceptibles d'y remédier.

This book suggests a theoretical framework for the non-democratic and illiberal donors of foreign aid and tests the empirical support of this framework. It aims to examine the foreign aid motivation and preferences of non-democratic and illiberal countries. The study applies the quantitative methodology to understand why nondemocratic and illiberal regimes provide foreign aid and what affects their aid preferences. The findings show that the nature of the relationship between the government and the business elite influences both aid motivation and aid preferences in those countries.

In Africa, the emergence of the first unrecognised/de facto states is intricately linked to colonial legacy and subsequent decolonisation. This legacy maintained the newly formed African states within the artificial boundaries established on the continent by European colonisers. Paradoxically, both currently existing unrecognised states on the African continent, Western Sahara and Somaliland, aspire to function as independent entities within these colonial boundaries.

Population movements taking place in past decades, including those reaching the European Union, defy straightforward and simplistic conceptions of drivers, trajectories and forms of migration. Approaching migration journeys as non-linear processes, this book looks into the conditions and legal-policy frameworks at broad spaces of mobility interlinking several origin, transit, destination and host contexts in South/Central/Western Asia, Eastern/Central/Western Africa, Central and South America, and Europe to provide a more nuanced understanding of mixed migration. It also looks at specific migratory trends towards the European Union before and after the so-called 'migration crisis' (2009–2020), while paying particular attention to gender- and sexuality-specific dynamics and patterns.

This compelling book delves deep into the intricate tapestry of Euro-Mediterranean politics and diplomacy, shedding light on the motivations that guided the actions of key political players from the 1980s to the Arab Spring. The author, on a challenging quest, identifies and interviews the very politicians and diplomats who shaped these relationships, uncovering a stark realism that superseded idealistic notions when crucial decisions were at stake. The author's focus turns to Spain, and to a lesser extent, France, as they navigate the intricate web of Euro-Mediterranean politics to gain greater diplomatic influence, regional power, and strategic leadership within the European Union and the southern Mediterranean rim. Cet ouvrage bilingue français-anglais s'inscrit pleinement dans le projet scientifique du CERDAP2 à Sciences Po Grenoble-UGA, ayant pour objectif la mise en évidence de reconfigurations institutionnelles et politiques internationales, et de nouvelles rationalités contemporaines. Il analyse, pense, propose, et teste des modèles nationaux, régionaux, et internationaux de gouvernance en évolution, et donne toute leur place aux acteurs institutionnels et à ceux de la société civile. Il intègre l'ensemble des protagonistes (y compris les acteurs transnationaux) impliqués dans des dispositifs administratifs, politiques, économiques, diplomatiques, et stratégiques en recomposition continue. Son approche comparatiste est ancrée dans l'histoire et étudie en profondeur des exemples concrets de cinq continents, en conciliant avancée méthodologique, stratégie et géopolitique, relations et politiques publiques économiques internationales et créations institutionnelles, et mutations des identités et représentations en sociologie politique internationale.

At its onset, the American Indian Women of Proud Nations Organization set out to create a space that would uplift Native American women, children, and families because of their central roles in the continuation of Native communities. The contributors to the second edition continue to document and reflect on the organization's initiative and the efforts of Southeastern Native women and their allies to center women, children and families in protecting and strengthening kinship, land, and language as enduring aspects of Native American cultures. The second edition offers updated research on language revitalization, adolescents and their parental caregivers, Indigenous issues in higher education, and new work on matrilineality, the Missing and Murdered People crisis, and the continuation of healing traditions in a contemporary context.

Political Structure & Processes

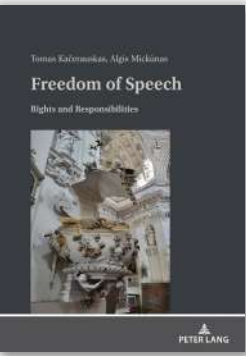

The book's focus is on freedom of speech and what content can place it in jeopardy. The sources, discussions and limitations of free speech, the relationship between ideology, freedom of speech in the media, and public issues are analyzed. From historical point of view, the citizens of more or less democratic societies assume freedom of speech as a basic right to challenge dictatorships, totalitarianisms and authority of any kind. Freedom of speech cannot be understood without the fundamental principles of democratic society, including a tolerance of others, their right to express various and unique opinions, open to challenge by others, and requiring mutual respect. Three domains for social responsibility concerning freedom of speech are addressed: practical, ecological and creative.

In modern political science, the phenomenon of political leadership is described and explained using diverse theoretical models, different analytical perspectives, or different research scales. Keeping in mind this theoretical and research pluralism, the author suggests applying an original integral explanatory strategy, which defines the relational leadership asymmetry between the leader and followers in terms of a dialectical subject-object relationship (co-determination); that is to say, in terms of a dynamic and complex political process in which the interdependencies and mutual influences of the leader and followers fall under analysis. In this sense, leadership is treated as a processual phenomenon in which the form, content, and shape of leadership [...] [Click here to read more.](#)

The main objective of this book - *New Political Parties in the Party System of Poland* is to analyse and investigate new political parties that were successful in the parliamentary elections of 2011, 2015 and 2019 in Poland, as well as to analyse the Polish and Czech party systems in a comparative manner. The entry of new groups into Parliament has led to significant changes in the Polish party system, sparking discussions about business parties, populism and the role of social media in election campaigns. The book includes the following political parties: Palikot Movement, Modern, Kukiz'15, Robert Biedroń's Spring and Confederation.

Peace treaties are no guarantee of a sustainable peace and the current scale and longevity of global conflicts are an unpleasant testimony of the fragility of peace processes. The purpose of the book is to explore the forms of leadership needed to transition a violent conflict into positive peace, and to create the social and political conditions that will sustain that peace. The study is based on the Northern Ireland peace process and explores how the quality of political leadership impacts both conflict resolution and the sustainability of a peace agreement. A phenomenon named «Acts of Leadership» will be used to demonstrate that peacemakers are not necessarily people in positions of power or authority but they bring valuable lessons for political and military leaders. "Sally Watson has produced an important volume illuminating the crucial role of leadership within the Northern Ireland peace process. The book covers the different dimensions of delivery needed to deliver a successful process. These include the steering of political parties in sometimes difficult directions and away from contentious pasts; the need for inclusion, a feature eventually recognised by the British and Irish governments; and the requirement for healing leadership to help reconcile a divided society. The author highlights how, in terms of reconciliation, there remains much work to be done. This is a fine addition to the work on Northern Ireland which ought to be read by any student of peace processes."
- Professor Jon Tonge, University of Liverpool

"This is a gem of a book, which sheds light on how diverse leadership approaches have shaped the Northern Ireland peace process. It offers a narrative account of the peace process looking through leadership eyes, offering very rich insights. Its major contribution is that it brings to the fore the vital importance of language and discourse in the work of leadership. This book is a great study of leadership and I recommend it to leaders in all walks of life."

Constitutional consciousness belongs not solely to the legal field, but also to other social sciences. It refers not only to constitutional and national identity but also to European identity, as the general principles of EU law derive from common constitutional traditions. Its low level results with difficulties in the proper reading of the legitimacy of power and with the recently widely discussed democratic deficit both in member states and in the EU itself. The publication addresses the issue of European integration and the common catalogue of values and human rights. The aim is to point out that increasing its level in society shall bring remedy for the democratic deficit in the EU and strengthen respect for fundamental rights. This thesis gives the publication an innovative Character.

The Austrian case of nation formation was a latecomer in the European perspective. Only after the II World War did the Austrian nation form, which resulted in a general omission of the Austrian case from major theoretical works and comparative studies. The book is a summary of classical and modern nation formation theories, as well as an inquiry in the process of Austrian nation formation. The author firmly places the Austrian case in necessary theoretical framework. The book focuses on nation building policies conducted by the Second Austrian Republic and the changing ways in which the Austrian nation was perceived (a cultural or political nation?). The main focus of the author is the ideological background provided historians in the aforementioned nation-building process. The book also delves in the politics of affirmation and opposition to the new Austrian national identity.

Cet ouvrage collectif pose à nouveaux frais la question des modes d'exercice du pouvoir politique. La différenciation croissante des sociétés contemporaines implique que les gouvernants prennent appui sur diverses formes d'intermédiation leur permettant, avec un succès jamais acquis par avance et sans cesse susceptibles d'être remis en cause, de s'assurer de l'obéissance au moins relative des gouvernés. C'est aux reconfigurations contemporaines de ces intermédiations du pouvoir politique qu'est consacré ce livre. Par la mise en relation de treize enquêtes relatives à des sociétés contrastées, il donne à voir la grande variabilité des modes d'exercice du pouvoir politique et tente, en creux, de dégager quelques régularités quant à l'allongement contemporain et à l'invisibilisation des chaînes de domination politique.

The book examines Slovak education as an example of totalitarianism, exploring two opposing sides: the publicly expressed values and ideals of official compulsory education subordinated to government power and the alternative ideals and concepts of unofficial education implemented by informal groups and underground organizations (dissent). The authors seek answers to Hannah Arendt's iconic questions: What happened? Why did it happen? How could this happen? The title of the book also references the dualism in the lives of individuals and families who did not identify with the doctrine of Marxism-Leninism and totalitarian ways of governing. In order to preserve their inner freedom, they lived a double life, one in private and the other in public.

The book examines the problems of local self-government reform in Ukraine during the period of martial law. The internal focus is on the process of decentralization, which includes all levels of implementation of governmental powers and public initiatives. The external focus is on European integration as defined in the Constitution of Ukraine. The relevance of the research is evidenced by the systemic changes in Ukraine's domestic and foreign policy, the processes of decentralization and European integration, as well as the challenges associated with the active phase of Russian aggression. It is argued that a comprehensive political and legal framework needs to be established in order to exploit the potential of the institution of local self-government. The book concludes by emphasizing that the processes of European integration and decentralization of power during the period of martial law represents a priority of the modern state-building phase of Ukraine.

Este libro ofrece un análisis comprensivo único del proceso de paz entre el Gobierno colombiano y el ELN durante el periodo 2010–2019, con base en diferentes análisis. Aborda tanto el proceso de negociación en sí mismo como los factores de contexto que tuvieron una influencia en él. Abarca una amplia gama de temas, como los enfoques de negociación empleados y sugeridos, la participación de la sociedad, la estrategia comunicacional de las partes, consideraciones de género, la construcción de confianza, el primer cese al fuego bilateral entre las partes, la estructura y características clave del ELN, y la disposición de las partes para una salida negociada al conflicto armado. También ofrece un análisis prospectivo del proceso de paz de cara al futuro. La combinación de estos análisis ayuda a proveer un balance más integral y soportado del proceso de paz y derivar lecciones aprendidas útiles para negociaciones futuras entre las partes mencionadas, así como para otros procesos de paz.

“Este libro es un recurso invaluable para cualquier persona interesada en comprender las complejidades y oportunidades del proceso de paz entre el Gobierno colombiano y el ELN. Lleno de reflexiones profundas y lecciones aprendidas de mucha relevancia para el proceso que empezó en 2022 y muchos otros procesos del mundo, con recomendaciones concretas y acertadas, el libro ofrece perspectivas diversas e interdisciplinarias con un número impresionante de entrevistas con actores clave – poniendo su voz en el centro.”
- Dra. Sophie Haspeslagh, docente, King's College London

“Un libro indispensable para conocer al ELN, las transformaciones que ha experimentado en los últimos años en medio del escalamiento de múltiples formas de violencia y el alcance de su propuesta de definir los contenidos de la agenda de negociación con base en la participación de la sociedad. Una mirada que rompe con los prejuicios que se han construido sobre la imposibilidad de negociar con el ELN poniendo de presente, con rigor académico y realismo político, las dificultades y los desafíos que plantea el hacer de la negociación un camino posible hacia la democratización integral de la sociedad. Libro necesario para entender una paz necesaria para cerrar definitivamente el ciclo de las guerras insurgentes en Colombia.”
- Dr. Jaime Zuluaga, docente investigador, Universidad Externado de Colombia

“Una paz aplazada, urgente y necesaria. Tres palabras juntas que describen una percepción generalizada en los círculos políticos, académicos y de opinión informada, aunque el acostumbramiento a la violencia nos haya llevado a pensar que podíamos sobrevivir con este incendio, alimentado por rescoldos y puntos calientes sin apagar. Más que un libro, Cécile y Esperanza, sus editoras, nos ofrecen un estudio académico no exento de sentido crítico, juicioso y contrastado con connotadas fuentes de conocimiento y opinión sobre el conflicto y las paces intentadas con esta insurgencia, la última que sobrevive a la eclosión guerrillera de la década de los sesenta, alentada por el ardor revolucionario de la Cuba liberada. Hoy cuando se intenta un nuevo proceso, en un contexto más decidido hacia la paz negociada, este libro cobra vigencia, fresca y despierta interés. Si este libro no existiera habría de ser escrito, sin atenuantes.”
- Carlos Arturo Velandia, promotor de paz

Volatility is one of the most characteristic features of contemporary security. The level of threats increases or decreases, completely new phenomena appear and quickly disturb the global balance and threaten the durability of security systems. This dynamic nature of security verifies both the state and process, as well as their understanding by researchers. The monograph refers to key aspects of the contemporary understanding of security, in its military, political, social, and informational context, as well as other dimensions. It presents and analyzes the identification criteria and determinants of security and characterizes the nature of contemporary threats and the dynamics of their changes. Armed conflicts, terrorism, migration, digital threats, loss of national identity, and populist use of security categories [...] [Click here to read more.](#)

The war in Ukraine has not only affected the political, economic, social, and cultural systems but also the education and schooling system. The full-scale assault of the Russian Federation on Ukrainian territory on 24 February 2022 disrupted the teaching and research systems. The necessity of finding scholarly answers to tough questions about the situation of the universities – their academic staff and students – during the war, the solidarity attitude of universities in foreign countries, and the status of Ukrainian Studies are the causes of preparing this publication. The value of this volume is that the authors of most of the articles are specialists and theorists of the subject, at the same time observers and witnesses of the events and processes described, often actively involved in them.

This book focuses on social and political developments in Armenia during a turbulent post-2018 period. Between 2018 and 2020, the country experienced three significant waves of upheaval: a revolution, a pandemic, and a war. These events had far-reaching implications for Armenia's social, cultural, security, and political foundations. The book provides both factual insights and theoretical underpinnings that help readers understand the country's transformation and the resulting challenges. In its immediate neighbourhood, Armenia is one of the few countries with a clear commitment to democratic governance. However, the country, with its democratic potential in Europe's eastern neighbourhood, [...] [Click here to read more.](#)

Still today, the unequal and gendered distribution of power and participation in American politics remains perplexing. To address this challenge, Banwart and Bystrom examine the research from political communication, political science, and psychology to deepen our understanding of the intersection of gender and politics. Starting with the most common theoretical approaches, they trace the history of women's right to vote in the U.S., women's political participation, the political socialization of U.S. citizens, gendered political candidate communication, and gendered media coverage. The authors demonstrate how gender stereotypes play an influential role in citizens' perceptions of both politics and those seeking to participate in it. They conclude with an analysis of the 2022 midterm election cycle to expose lessons learned and existing barriers as we look to 2024 and beyond.

The process of the Orthodoxization of memory in Russia started long before the Russian Orthodox Church engaged in the memory politics. It was a grassroots process initiated by both the living and the dead. By using religious symbols and rituals, various groups of living were restoring their relationship with the forgotten dead of Soviet repressions and war. When the Moscow Patriarchate has returned to active public life and started developing its religious memory infrastructure, the Orthodoxization process got a new up–down dimension. Finally, a turn of the Putin's regime towards religious commemorative practices caused the disappearance of the boundary between religious and political memory. The bricolage memory, consisting of elements of Orthodox tradition and Soviet memory culture, appeared.

Toutes les villes, passées et présentes, comprennent des espaces ambigus, aux fonctions ou aux statuts incertains dont l'étude a longtemps été négligée. Qu'ils soient vides ou occupés, bâtis ou non, ces espaces semblent souvent à l'abandon mais sont aussi menacés, occupés, convoités. Ils peuvent (re) devenir communs ou cesser de l'être. Espaces à prendre, ils sont donc aussi à saisir intellectuellement. Prêter attention aux interstices urbains conduit à porter un regard neuf sur les dynamiques informelles, les régulations qui procèdent de l'usage, les processus d'institutionnalisation qui se soustraient à l'emprise de l'État. Cet ouvrage se propose donc de réfléchir à la jonction entre interstices et communs. Il réunit des spécialistes de la ville provenant de disciplines différentes (sociologie, géographie, histoire, histoire de l'art, droit, littérature, urbanisme...). This book probes the mythic underpinnings of U.S. war culture, asking how myth can be reconfigured to foster a discourse more conducive to a culture of peace. It breaks with an imperial mindset of endless warfare and places myth's creative potential into productive relationship with rhetoric's democratic vocation to foster an attitude of tolerance and interdependence and resist the violence of alienation. Drawing on the archetype of coyote and manifestations of a people's better angels, the book examines both the resistance of imperial orthodoxy to critique and susceptibility to cultural change. It locates Barack Obama's presidency and rhetorical juggling at the threshold of a shifting hemispheric consciousness and explores the prophetic voice of veterans opposed to war, a voice that prefigures the possibility of conversion to a culture of peace. The book culminates in consideration of democracy's renewal by means of rhetorically adept dissent to enable deliberation amidst conflict.

"After Empire chronicles America's addiction to war-in-the-name-of-peace, wherein the military-industrial complex entwines with crippling national mythologies. Drs. Ivie and Giner argue that by seeing the world as a series of threats, our imaginations have shriveled, leaving us rotting from self-righteous exceptionalism to other-fearing doubts. Moving past that dynamic, the authors plot a "passage to democracy," where the nation grows out of imperial hubris and into mature, deliberative democracy."
- Stephen J. Hartnett, Professor, Department of Communication, University of Colorado, Denver

"In After Empire: Myth, Rhetoric, and Democratic Revival, Robert L. Ivie and Oscar Giner unpack the way that contemporary American myths of war have played a role in legitimizing war and creating an American empire built around a militarized society. They show that creation of an alternative mythology privileging dissent is essential to rebuilding American democracy. The book is cogently argued, based on groundbreaking research on myth and militarism, and a genuine pleasure to read!"
- Robert C. Rowland, Professor, Department of Communication Studies, University of Kansas

"After Empire offers both an analysis of contemporary US war culture and an intervention into it in the hope of making the US a healthier democracy. Focusing on the intersection of politics, popular culture, and myth, and deftly integrating theory, method, and substantive content, Ivie and Giner provide a map of the current US public sphere in ways that will interest academics as well as practitioners and prove useful for courses in rhetoric, history, and political science."

Assistons-nous à l'émergence d'un droit à une alimentation saine et/ou durable ? Cette recherche, s'inscrivant dans les pas de Dworkin et des *Critical Legal Studies* et combinant la méthode traditionnelle en droit à des entretiens, tente de répondre à cette question par une analyse empirique des développements récents, spécialement en Europe. Le lecteur trouvera réponse à ces questions : quels sont les leviers et obstacles à la reconnaissance d'un tel droit ? Doit-on le reconnaître comme droit autonome, et si oui avec quel contenu, quels titulaires et débiteurs ? Quelle valeur ajoutée d'une approche par les droits humains ? Comment faire évoluer cette approche pour répondre aux exigences d'un droit à l'intersection des préoccupations de la dignité, santé humaine et santé du Vivant en considérant l'aliment comme un fait socio-culturel ? Cet ouvrage invite ainsi plus largement à faire évoluer l'approche des droits humains en période d'Anthropocène.

Inter-ethnic political integration is a major theoretical and practical problem which is increasingly prominent in the political reality of multi-ethnic countries. This book is the final result of a special study on inter-ethnic political integration, emphasizing and proving the basic concepts and questions of inter-ethnic political integration, constructing a theoretical system of inter-ethnic political integration, forming a theoretical framework of inter-ethnic political integration, and thus promoting the healthy development of inter-ethnic political integration research.

The work, entitled *The Language of Czech and Polish Civil Law Contracts: A Comparative Study Based on Corpus Research*, is devoted to aspects of the field of specialised translation and provides an overview of the current state of translation studies. The main trends are presented, along with profiles of scholars working in the field. In relation to corpus research, translation studies methodology is also described, along with the main tools of corpus analysis, and the concept of a corpus is explained with an indication of the typological division of corpora. The work focuses also on the translation process from an external point of view (the client's) and from an internal point of view (the translator's), discussing the tools, techniques and strategies used in specialised translation.

Science is magic that works.

Action publique / Public Action

Border Studies

ÉDITÉ PAR STEVE JACOB AND NATHALIE SCHIFFINO-LECERCQ

EDITED BY BIRTE WASSENBERG, FRÉDÉRIQUE BERROD, JOACHIM BECK

La collection *Action publique* étudie le fonctionnement de l'État sous des angles multiples. Elle privilégie l'analyse des politiques publiques (environnement, santé, emploi, culture, etc.) et l'étude institutionnelle et organisationnelle des administrations publiques. Les mutations qui caractérisent aujourd'hui l'action publique (déréglementation, externalisation, contractualisation, action en réseaux ...) sont au cœur de ses préoccupations.

Ainsi la collection *Action publique* accorde-t-elle également une place importante aux rapports que l'État entretient avec son environnement, l'appareil politique et la société civile bien sûr, mais aussi avec les évolutions sociétales plus larges (individualisme, globalisation, etc.).

La pluridisciplinarité est une caractéristique essentielle des travaux contemporains dans le domaine. C'est pourquoi cette collection encourage les approches économiques, historiques, juridiques, politologiques, sociologiques et philosophiques.

The Series "*Borders and European Integration*" fills in a gap in Social Sciences, as it connects two so far independent research strands: European Studies and Border Studies. Mainly initiated by geographers and originally hosted in the United States, Border Studies primarily deal with the study of borders and borderlands, whereas European Studies analyse the process of European Integration, its actors, institutions and policy fields. Although the idea of a Europe without borders was part of the project of the European Economic Community, the multidimensional role of the border has not been sufficiently taken into account by researchers in European Studies. Inversely, Border Studies have only rarely examined the specificity of borders and borderlands in Europe in comparison to other regions in the world. At the crossroads between Area Studies and International Relations, this Series therefore offers a pluri-disciplinary approach to borders and their role in the European construction. Taking into account the perspective of different disciplines in Social Sciences, the diversity of actors of European Integration and borderlands (local, regional, national,) it allows a new multi-level and decentred view on conflicts and cooperation at European borders. The Series addresses researchers and university scholars of all disciplines in Social Sciences and wishes to tackle the challenging contemporary questions on borders in Europe.

Eastern European Culture,
Politics and Societies

Europe des cultures /
Europe of cultures

EDITED BY IRENA GRUDZIŃSKA-GROSS

ÉDITÉ PAR LÉONCE BEKEMANS

The series *Eastern European Cultures, Politics and Societies* is devoted to the social issues that have been shaping the life of the post-communist European sphere. The specificity of the region and its continuous exposure to radical changes makes it a fascinating object of study. This is one of the reasons it attracts excellent researchers and writers. We published books by historians, sociologists, anthropologists, and literary, feminist and cultural scholars. We are planning to continue this interdisciplinary, cutting-edge work.

Frontiers in Political Communication

EDITED BY MITCHELL S. MCKINNEY AND MARY E. STUCKEY

At the heart of how citizens, governments, and the media interact is the communication process, a process that is undergoing tremendous change. Never has there been a time when confronting the complexity of these evolving relationships been so important to the maintenance of civil society. This series seeks books that advance the understanding of this process from multiple perspectives and as it occurs in both institutionalized and non-institutionalized political settings. While works that provide new perspectives on traditional political communication questions are welcome, the series also encourages the submission of manuscripts that take an innovative approach to political communication, which seek to broaden the frontiers of study to incorporate critical and cultural dimensions of study as well as scientific and theoretical frontiers.

La Fabrique du politique

Sociologie de l'action publique

New International Insights/Nouveaux Regards sur l'International

ÉDITÉ PAR CÉCILE ROBERT ET ANNE-CÉCILE DOUILLET

EDITED BY PIERRE CHABAL, ESRA LAGRO, TURTOGTOKH JANAR AND BRIGITTE VASSORT-ROUSSET

L'analyse des politiques publiques, des institutions et acteurs qui les conçoivent, a beaucoup gagné à s'ouvrir largement aux autres sciences sociales et particulièrement à la sociologie. Qu'il s'agisse des organisations internationales, des institutions européennes, des administrations nationales ou encore des collectivités territoriales, les enquêtes quantitatives et qualitatives sur leur personnel et leurs interlocuteurs privilégiés, l'observation ethnographique, le travail sur archives, permettent de renouveler le regard sur l'action publique. Attentives à la diversité des acteurs engagés dans la formulation des politiques publiques, ces recherches peuvent en outre s'appuyer avec profit sur les enseignements et concepts de la sociologie du droit, des organisations, des professions, ou des institutions pour éclairer la façon dont élus, fonctionnaires, experts, représentants d'intérêts, ou encore usagers y contribuent.

La collection accueille des travaux inscrits dans une telle perspective de recherche et mobilisant à cette fin tous types d'enquêtes et de données empiriques de nature à éclairer la fabrique du politique, de l'échelle locale à l'échelle internationale.
